

## **MESSAGE**

**Philippine Journal of  
Allergy, Asthma and Immunology**

Greetings of Peace and Blessings!

First of all, a big "Congratulations!" to PSAAI! This day, our 50<sup>th</sup> anniversary, may we all be healthy to celebrate this Golden moment.

In this time of the pandemic, we have come up with five versions of "A Review of Immunomodulators as Therapeutic Interventions for Moderate to Severe COVID-19 Infections," Guidelines for Health Risk Assessments for Adverse Reactions to COVID-19 Vaccines for adult, adolescent, and pediatric vaccinees, all to help our fellow physicians to be guided in the care of our patients.

Our efforts have not gone unnoticed locally but internationally as well. We continue to be an active member society of the World Allergy Organization, Asia Pacific Association of Allergy, Asthma and Clinical Immunology, and Asia Pacific Academy of Pediatric Allergy, Respiriology and Immunology. We have come this far because of everyone's concerted efforts and cooperation. For this, thank you very much.

Let us continue to work harmoniously by helping each other to better our current best for a stronger and healthier PSAAI.

God bless us more.

**Rommel Crisenio M. Lobo, MD, FPPS, FPSAAI**

*President, Philippine Society of Allergy, Asthma and Immunology*
